

PlotHelperAbstract

```
classDiagram
    class PlotHelperAbstract
    class PlotHelperScatter
    class PlotHelperScope
    PlotHelperScatter --|> PlotHelperAbstract
    PlotHelperScope --|> PlotHelperAbstract
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'PlotHelperAbstract'. Below it are two boxes, 'PlotHelperScatter' on the left and 'PlotHelperScope' on the right. A horizontal line connects the two bottom boxes, with a vertical line and an upward-pointing arrow from the center of this line to the bottom of the 'PlotHelperAbstract' box, indicating that both 'PlotHelperScatter' and 'PlotHelperScope' inherit from 'PlotHelperAbstract'.
